

Now that the FCC is considering rulings limiting telephone soliciting I would like to see that you do nothing to weaken the Indiana Telephone Privacy Law initiated this past year in the state of Indiana. It is so pleasant not having dinner, children's homework, and home improvement projects interrupted by sales persons. The Indiana law has done wonders to make being at home in the evening enjoyable. I used to get 3-5 calls every evening as late as 10:00pm, and now I do not get any calls. I love it, and I would like to keep it this way. Thanks for listening!!
